

GLADIATOR EVENTS LTD

ENVIRONMENTAL POLICY

Gladiator Events Ltd was established in 2013 to design and deliver outstanding and innovative challenge events to charities around the UK. The aims of the Company are to enable its charity partners to raise the maximum funds possible to carry out their essential work.

Our events take place in private Estates, public parks and on public paths and roads. It is of utmost importance to us that there is no negative impact to the land from our events. Our fees assist our venue partners to protect and conserve their land.

The Gladiator Events Team are outdoor enthusiasts and are passionate about protecting the environment. We recognise that our events can have a negative impact on the environment and we manage this impact through improvements in:

- Waste Management
- Procurement
- Power
- Travel
- Community Engagement

We aim to inspire our charity partners, event participants and suppliers to join our efforts and in turn to encourage a behavioural change. We are creating a five-year pledge which we hope our suppliers and customers will join us on.

You can see a list of our sustainability efforts to date here:

www.gladiatorevents.co.uk/sustainability.

Our sustainability efforts are ongoing and rapidly developing. We are committed to continually assessing all areas of our operations to minimise our impact on the environment, and to keep abreast of developments in technology and innovation that allows us to lead the way in environmentally responsible events.
